WASHINGTON LETTER.

Watersorow, Nov. 29, 1884, problem of what will be done or tempted at the short session of Congress seems to become more com-plicated as the number of fractions and Representative in Washington increase. There are Senators and Representa-tives, and if there is at some very rapid getting together when Con-gress meets it is possible that the seegreen meets (1 is personal to the pas-son will be devoted to talk and the pas-son got the regular appropriation bills, onless action upon the Cuban question be had that will cause war with Spain.

be had that will cause war with Spain.

Members of the administration will publicly way they do not expect troubles with Spain, but there are hints about the manner in which President Cleaveland will handle the Cohen question in hie message to Congress which serves as a basis for the continuation of war runners, and the war appropriations the administration is making cause that they coherevise would. This week an additional fares of men was put to work in the big gon shop at the Washington Navy Yard and the men divided into three shifts of sight hours each, in the big gon shop at the Washington Navy Yard and the men divided into three shifts of sight hours each, in the big gon by the Washington Navy Yard and the men divided into three shifts of sight hours each, in the big gon by the big that the work may be kept going night and day. Of course those preparations only to cistended as a binff to keep the hot-handed Spaniards with hair trigger tangenes from doing anything to make war precessery.

There is a hempest in a beaped on in Washbigton, which can only be quiseful too make war precessery.

ing that while the imagoration com-mattee is a 'any post-partiannist' amake, up the rhatman is always a momber let the winning party. Mr. Hanns be con-ing to Washington to settle the matter, There may not be a general facilit full after all, although there will most cer-tainly be an extra session of the Frity-fith Congress called supersely to legis-late on the tariff. Statements from geomicant Republicans would seen to indicate that they profer to amount the present tariff law, instead of preparing an entirely new bill, and their action may be followed. Chairman Dingley, of an entirely new bill, and their action may be followed. Chairman Dingley, of Heuse Ways and Means committee, and Seanier Chandler are among those who have expressed themselves in favor of anending present tariff laws. The latter greatening gives as one of his reasons that it will be such easier to amend the present law so that it will be extinately and produce sufficient revenus. That plan will not, however, he followed without a vigorous protest from those Republicans who think their party should propers and pass a these party should propose and pass a tariff bill of its own and not try to ratch up the has now in force. It is a little early to be discussing this matter, inthe early no be discussing this matter, but in political circles the probable as-kion of the Fifty-fifth Congress is being much more discussed than the short weston of the Fifty-fifth Congress, new alreads apon us. One of the many things that are diffi-

of to understand is the power wielded sear Congress by the becomes of the country. Nearly every Scouter or Rep-trocatables who will talk about the resentative who will talk about the matter at all agrees that the mainet were to cost the conditions and friend has been been as a supplied to the condition a barrel be the internal fraction for on been; that it made's east the govern-ment a cost crits to collect the every, and that the Transie's will have it very lands in the mean factors, but they all when it is now in the collection. landly in the near future, but there all wind up by saying that the browen deleast the but'll on artempt to made to passit. It howe the it would be a good idea to go a built providing for this has forced be a web, it sucher to see just have powerful the browns are. Many things defeated in remaintness and by localisative jugglesy could not be defined by an appear one in Congress.

There is more in Jean group as to whether the Republicant impairs a fill with the allow Resultibles furnished.
